

User Manual : 36W Power Adapter

Product Introduction

Please confirm whether the model is the same as the actual one. You now have our specified model of the 36W power adapter. The conversion efficiency of this model is higher than 85%. It has output over-current protection, short circuit protection and constant output voltage and so on.

Technical Parameters

Input Voltage	100~240VAC,50/60Hz
Input Current	1A Max
Load loss	0.3W Max
Output voltage	12VDC
Output current	3.0A Max
Output Power	36W
Output ripple	120mVp-p

Using environment

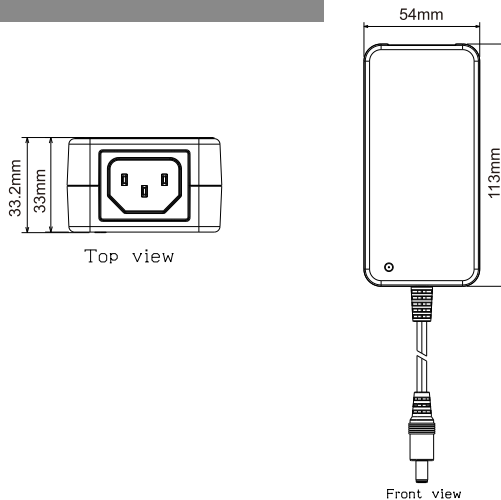

Operating temperature:-20~45℃
Operating humidity:20~90%RH

Storage temperature:-25~65℃
Storage humidity:10~95%RH

Appearance

1. Size: L113mm*W54mm*H33.2mm
2. Input: 3 PIN AC power plug (can be changed according to customer's needs)
- 3.1Output : 5.5mm * 2.1 mm * 11 mm or 5.5mm * 2.5 mm * 11 mm DC plug (can be customized)

Details

Power instruction description

NO	Name	Specification
1	AC Input Plug	The plug and socket are disconnecting devices. Pay attention to ensure convenient operation during installation.
2	DC output Plug	The standard specification is 5.5 * 2.1 * 11mm or 5.5 * 2.5 * 11mm DC plug, Also can be customized as requirement
3	LED Power Indicator	The indicator light is on for normal output, and off may be caused by the plug being disconnected from the power grid or power failure

Attention

- 1.The power plug and socket are disconnected devices. Please pay attention to keep it easy to operate during installation.
- 2.Before powering on, please check whether the input and output wiring is correct to avoid damaging the user's equipment.
- 3.After plugging in, the power indicator light is off or no output. Please check whether the wiring is wrong, if there is no normal output, please send for repairing.
- 4.Do not install the power supply in direct sunlight, high temperature, rain and dust environment.
- 5.Must be careful not to use in environments with water splashes and water droplets.
